

we write about the things we build and the things we consume

written by Jonathan Tweed on 20 June 2013 in Atlas, release notes

atlas release notes – week to 18th june

Here are the [Atlas](#) release notes for the week to 18th June.

The following items have been deployed to production:

- IDs on content – [this a big deal](#)
 - These IDs are now stable and will carry across to 4.0
- Stronger series matching in VOD equivalence

The following items have been deployed to staging, for a future production release:

- Multiple channel logos, including transparent logos for light and dark backgrounds

Any questions or suggestions about any of these, Atlas or its development process, please do ask on the [Atlas discussion group](#). You can also raise a ticket for any [issues](#).
