atlas release notes – week to 18th march

Here are the [Atlas](#) release notes for the week to 18th March.

The following items have been deployed to production:

- Support for Reviews data.
- Equivalence tasks for C4 PMLSD data.
- Localized descriptions and titles.
- Fix ordering of follow-on broadcasts.
- Changes to Application model for Stripe integration.
- Add CORS headers to OPTIONS requests.
- Fix for Redux ingest.

The following items have been deployed to staging, for a future production release:

- Support conversion from Episode to Item.
- Switch to PMLSD source for Interlinking.

Any questions and suggestions about these, Atlas, and its development, please bring up with the [Atlas community](#). You can also [raise tickets](#), [fork us on GitHub](#), [explore the API](#), and talk to us on [Twitter](#).
