

# we write about the things we build and the things we consume

written by Oliver Hall on 6 August 2014 in Atlas, release notes

## atlas release notes – week to august 5th

Here are the [Atlas](#) release notes for the week to 5th August.

The following items have been deployed to production:

- (Atlas) Merge genres on output.
- (Atlas) Allow removal of Channels from Channel Groups.
- (Internal MB Vimeo ingester): Caching of content in Cassandra.
- (Internal MB Vimeo ingester): Rate Limiting.
- (Internal MB Equivalence Monitoring system): Add ability to rate equivalence graphs manually.

The following item has been deployed to staging, for a future production release:

- (Atlas) Extensive refactor of output feed to RadioPlayer.

Any questions and suggestions about these, Atlas, and its development, please bring up with the [Atlas community](#). You can also [raise tickets](#), [fork us on GitHub](#), [explore the API](#), and talk to us on [Twitter](#).
